

WGLBBO Policy on Advocacy -- 27 April 2017

*The Observatory may from time to time, and as resources allow, advocate publicly regarding an action, when the Observatory is uniquely qualified to do so, and when such advocacy has the potential to advance the Observatory's mission.*

*Actions to be considered for advocacy by the Observatory may be introduced by any Board Member. The Observatory's public response, if any, will be approved by the Director and the Chief Scientist, and, except in cases where the response time is short, and the matter is urgent, also by the Chairs of the Science and Governance Committees. All public statements resulting from this process will be shared with the Board.*
